Type d'offre : Corporate offer

Post date: 03.06.25

## **DeepFlows**

# **CTO Late Co-Founder**

## Informations générales

**Contract type:** Permanent contract

**Contact:** 

**Greg Batby** 

**Starting date:** Mon 01/09/2025 - 12:00

#### **DeepFlows:**

Founded in 2024 by ML & Soft engineers from Google, Polytechnique, Centrale Paris, and a former investment banker, <u>DeepFlows</u> is a fast-growing technology company that automates tedious analytical work for founders, financial advisors and investors. <u>Backed by private investors from J.P. Morgan, Morgan Stanley, Meta, and others, and backed by Microsoft</u>, the platform leverages cutting-edge Al agents to radically accelerate and improve decision-making in M&A, private equity and asset management.

#### Détail de l'offre (poste, mission, profil) :

**Key Responsabilities & Tech Stack** 

**Domain** Key Missions

Al Pipeline Dev.	Design, build, and optimise a multi-agent orchestration layer (CrewAl → LangChain), plug-and-play LLM back-ends (Azure OpenAl, Amazon Bedrock), Retrieval-Augmented Generation pipelines (vector + knowledge-graph RAG in Neo4j), and a full evaluation/observability loop
MLOps & Infra	Own end-to-end CI/CD for models and services; containerise with Docker, run at scale on AKS/EKS, and govern experiments via Azure ML + MLflow. Stand-up AWS pathways for Bedrock-native models and future hybrid workloads
Data & Knowledge Engineering	Ingest and transform high-volume financial data using PySpark and Pandas; power low-latency search with FAISS vectors and Azure Cognitive Search; manage graph relationships in Neo4j and analytics in Azure Synapse
Security & Compliance	Unqualified SOC 2 Type II audit; zero major pen-test findings
Al Product Strategy	Translate fundraising and investor workflows into NLP/LLM solutions; drive model-selection, prompt-tuning, RAG/KG innovation, and cost-to-accuracy optimisation; maintain a forward-looking tech radar for emerging foundation models
Leadership & Culture	Set engineering standards, run design reviews, and foster knowledge-sharing through Linear, GitHub, Azure DevOps, and living internal docs; mentor a high-performance team and recruit top-tier Al talent

### **Qualification & Required Skills**

- Degree in computer science, software engineering, or related field, or equivalent experience;
- At least +4-6 years of professional experience in Machine Learning Engineering and deep hands-on expertise with LLMs, retrieval-augmented generation, and knowledge graphs;

- Proactive and capable of working independently, yet thrive in collaborative team environments;
- Comfortable interfacing with customers, investors, and the board;
- **Bonus**: Published research or open-source contribution in NLP . Experience with Finance/Investment firms. Prior success in a seed to series B startup journey.
