

# Biosys-Lideogram

Visualisation et apprentissage automatique pour  
une modélisation interactive d'un bio-système

Nathalie Marie MEJEAN

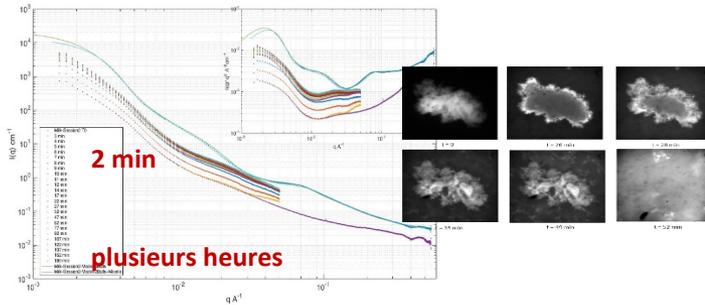

Nadia Boukhelifa, Evelyne Lutton, Alberto Tonda and Co  
Fernanda Fonseca et Severine Layec pour l'application

# Biosys-Lideogram

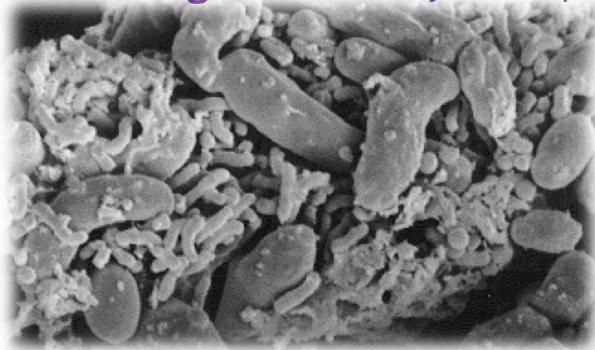

## Avant Propos

Des cinétiques à temps variables et échelles variables

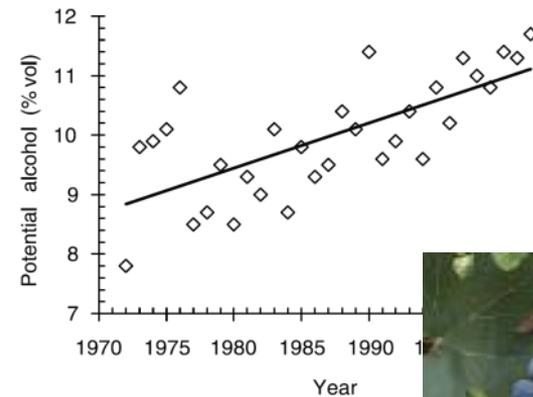

### Cinétiques de digestion

Cinétiques bactériennes pour représenter l'affinage de fromages *environ 15 jours ou plus*

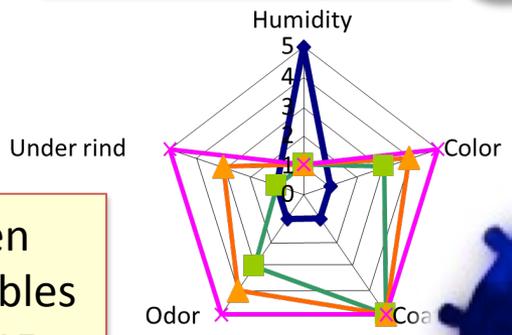

### Cinétiques lentes du climat

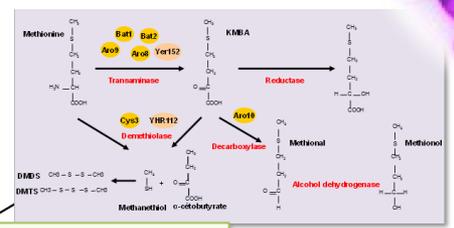

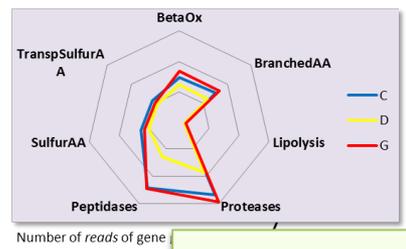

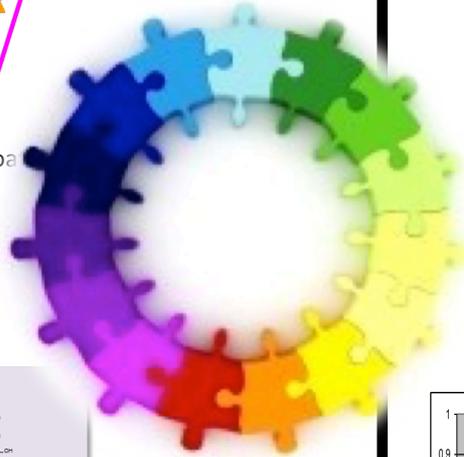

# Big Data... & Sparse Data

Sensory space en moyenne 10 variables symboliques, 8-15 cinétiques

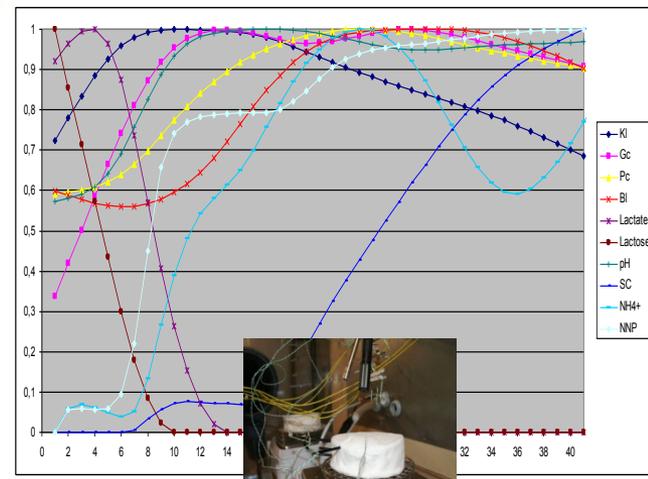

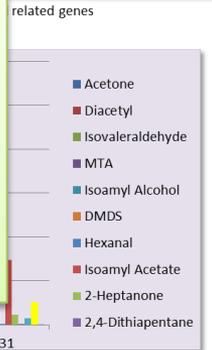

Microorganisms space moyenne 15 variables numériques, 8-15 cinétiques

Sicard et al. 2011, Expert Systems with Applications, 38(9), 11804-11812.

Genomic space sur 1 écosystème de 9 microorg., 40000 expressions de gènes et 3 expériences

# Biosys-Lideogram: un travail d'équipe

## Symbolique:

Contraintes explicites sous formes de règles ou de contraintes

## Sub-symbolique:

Connaissances non déclaratives

## Étape 1

Liens explicites entre variables.  
Formes mathématiques :  
graphes, contraintes, classes, règles

## Étape 2

Apprentissage, Optimisation  
Émergence itérative d'un modèle.

*Exploration itérative de modèles*  
**Interactions fondées sur la Visualisation**

# Biosys-Lideogram

## L'application: production/stabilisation de bactéries lactiques

4 échelles:

- **Transcriptomique:** pour expression de 2744 genes;
- **Cellulaire:** 7 variables;
- **Population:** 3 variables;
- **Population-Bioprocess:** 4 ET 2 conditions procédé

4 expériences répétées 3 fois: 12 points de mesure

**Galactose transporter & conversion gene cluster**

**Arginine / Glutamate metabolism gene cluster**

# Biosys Lideogram

Expertise  
Machine learning  
Visualization

- ✓ Taking into account even partial and uncertain data.
- ✓ Integrate the explicit graphic description expressed by the experts.
- ✓ Integrate the cognitive pathways described by experts and accompany its formalization.
- ✓ Integrate the local know-how of the experts in a more multiscale view thanks to expert/machine interaction and exploration.

# Merci pour votre attention
