COMMUNICATION PACK

Resources and tools to showcase your projects and work supported by the DataIA Institute at Paris-Saclay University.

université PARIS-SACLAY

INSTITUT DATAIA
Science des données, Intelligence & Société

QUICK START

Valorise your work with the DataIA Institute!
Here you'll find the essential resources you need to promote your projects and work supported by DataIA: graphic design tools, templates, advice and ready-to-use templates.

01.
Logos & badges
Identify your connection with DataIA.

02.
Communication materials
PowerPoint, posters et LaTeX.

03.
LinkedIn
Banners, visuals and examples of posts.

04.
DataIA relay
Share your news!

GOT ANY NEWS TO SHARE? NEED HELP?

The communications team is on hand to support you and showcase your work.

SHORT SUMMARY OF THE DATAIA INSTITUTE

The **Institute for Research and Training in Artificial Intelligence at Université Paris-Saclay**. Established in 2017 as part of the National Research Agency's (ANR) 'Convergences Institutes' programme, it brings together and coordinates an ecosystem of over **800 researchers** from **50 laboratories**. DataIA supports the development of research and training in artificial intelligence by supporting innovative research projects, fostering interdisciplinary collaboration and strengthening links between academic and industrial stakeholders. **The Institute also helps to drive the Paris-Saclay AI ecosystem through numerous scientific events**.

As a recipient of the national IA-Cluster initiative in 2024 under the France 2030 plan, DataIA also plays a part in **training the next generation of artificial intelligence talent through the SacIAI-School project**, which supports students and early-career researchers from undergraduate to PhD level.

WHY SHOULD YOU COMMUNICATE ON YOUR WORK?

Communicating about your work **helps to raise its profile beyond scientific publications**, reaching researchers, partners, students and socio-economic stakeholders.

Sharing your projects, publications and results also helps to **showcase your career path and the work carried out within the Paris-Saclay ecosystem**. Scientific communication fosters exchanges and collaborations and can lead to new opportunities

WHY MENTION DATAIA?

Mentioning DataIA's support in your communications **helps to highlight the support your project has received and raise the profile of the work we have supported**. This also enables us to keep track of your latest news and share it with the DataIA community and the Paris-Saclay AI ecosystem.

It therefore helps to **raise the visibility of your work** and to integrate it into a network of researchers, laboratories and partners.

ENSURE YOUR WORK IS PROPERLY REFERENCED

SCIENTIFIC COMMUNICATIONS

Please use the ANR reference number for your project: This research project has received funding from France 2030, administered by the French National Research Agency (ANR), as part of the IA CLUSTER programme, reference ANR-23-IACL-0003 – DATAIA CLUSTER

HAL

For the relevant publications, please link your submissions to the DataIA collection to facilitate the identification and promotion of work supported by the Institute.

DATAIA COLLECTION CURRENTLY BEING CREATED.

TO COPY AND PASTE INTO YOUR MATERIALS

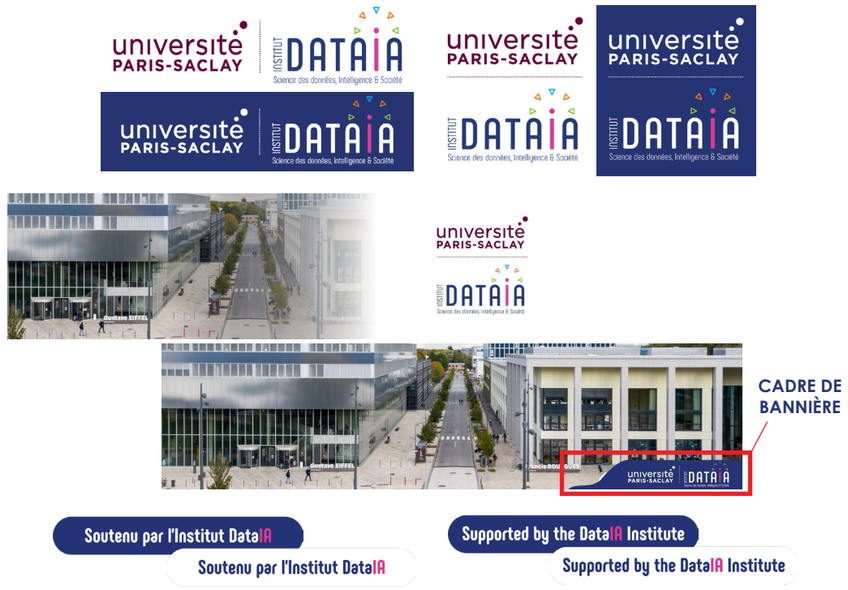

For any form of communication, please include the following statement:
« This work is supported by the DataIA Institute at Université Paris-Saclay ».

YOUR RESOURCES

01. IDENTIFY YOUR CONNECTION WITH THE DATAIA INSTITUTE

Use the official graphic elements to highlight your connection with the Institute.

- Logos
- Banners and frames
- « Supported by DataIA » badges

02. PREPARE YOUR MATERIALS

Ready-to-use templates for your scientific communications
PowerPoint presentation/Scientific poster
DataIA presentation slides/LaTeX templates/
Overleaf: document, article, slides, poster

> ACCESS RESOURCES

> LATEX TEMPLATES Overleaf

03. COMMUNICATE ON LinkedIn

Use a publication template for each news item

Examples in French and English are available and can be adapted to suit your news.

Tag @Institut DataIA Paris-Saclay

This enables us to identify your post and, when it is appropriate, share it

Please acknowledge the support provided by DataIA

« This research is supported by the DataIA Institute at Paris-Saclay University. »
